Tabelle der Verdachtsfälle im Zusammenhang mit der Anwendung des Arzneimittels bzw. des/der Wirkstoff(e)

Diclofenac incl. Salze (mono)

Hinweise zur Interpretation der Daten:

Es handelt sich bei den Berichten sowohl um Spontanmeldungen als auch um Berichte aus systematisierten Untersuchungen, aus Projekten oder aus der Literatur. Die Meldungen sind dem Bundesinstitut für Arzneimittel und Medizinprodukte durch pharmazeutische Unternehmer, durch die Arzneimittelkommissionen der Heilberufe, direkt durch niedergelassene oder in Krankenhäusern tätige Ärzte sowie durch sonstige Meldequellen, z. B. von Patienten, berichtet worden. Es muss beachtet werden, dass es sich um Verdachtsfälle unerwünschter Arzneimittelwirkungen handelt, dass also ein Kausalzusammenhang im Einzelfall nicht sicher belegt ist. Ferner lassen sich auf der Grundlage von Spontanberichten keine Aussagen darüber machen, wie häufig eine bestimmte unerwünschte Wirkung unter der Anwendung eines Arzneimittels vorkommt, und auch vergleichende Angaben darüber, wie viel mal häufiger eine bestimmte unerwünschte Wirkung bei einem Arzneimittel im Verhältnis zu einem anderen Medikament auftritt, sind anhand solcher Berichte kaum möglich.
